THE NORDIC FAN COMPANY

We are a Danish family company born out of a deep interest in how we can reduce our energy consumption and CO2 footprint as much as possible. An interest in how we collectively create climate-friendly ventilation solutions that generate the best possible indoor air quality, which increases both job satisfaction, learning ability and overall human performance.

PEOPLE AND CULTURE ARE OUR GREATEST ASSETS

At the Nordic Fan Company, we firmly believe that people and company culture are the two greatest assets we have. It is the combination of the two that generates new ideas, solves problems, brings new products to the market and drives us forward.

We care deeply about maintaining our culture and attracting people and partners that share the same basic belief and desire to make a difference. For each other. For the company. And for the planet.
